(*Trap Neuter Return*)

Problem with Feral Cats?

People cannot harm cats simply because they do not like them or because they think they are a nuisance. They cannot use dangerous chemicals or harmful products as deterrents. Doing so is illegal.

Thankfully there are safe and humane products and approaches that can be used to deter feral cats from your homes and property. These include:

- Coffee grounds
- Cayenne pepper
- Citrus peels (oranges, lemons, limes, etc)
- Chile powder
- Vinegar
- Rubbing raw onions on an area

In addition, the following herbs can be used to repel cats:

Rosemary

Lemon Thyme

Lemon Balm

Curry Plant

Lavender

Cintronella is also effective and can be used to repel other animals as well.
