WHEREAS, there are approximately 2.2 million owned dogs and 2.5 million owned cats in New Jersey and calls from citizens about animal related issues rival any other issue(s); and

WHEREAS, New Jersey was the first state in the nation to develop an innovative state-wide spay/neuter program and all proceeds from the sale of Animal Friendly License Plates are used to reimburse participating veterinarians for spaying and neutering surgeries; and

WHEREAS, New Jersey mandates training requirements for animal control officers and Animal Cruelty Investigators; and

WHEREAS, New Jersey impounds over 100,000 animals per year in animal shelters and impoundment facilities; and

WHEREAS, approximately 37% of the animals that enter New Jersey's impoundment facilities are euthanized; and

WHEREAS, free-roaming unvaccinated cats and dogs present a potential health threat to humans through the spread of such zoonotic diseases as rabies, animal bites, and environmental contamination from animal feces; and

WHEREAS, stray and unwanted pets place an enormous financial burden on municipalities and non-profit humane agencies organized to care for these animals and it is more humane and cost-effective to reduce the number of unwanted animals than it is to impound and euthanize unwanted or unclaimed dogs and cats; and

WHEREAS, all dogs are required to be licensed in the municipality where they are housed and the majority of municipalities also require licensure of cats.

NOW, THEREFORE, we the Township of Brick, resolve to take the following steps with regard to our municipal responsibilities with the intent of making the Township of Brick a truly sustainable community. WHEREAS, emissions from gasoline and diesel-powered vehicles contribute significantly to air pollution, including greenhouse gases, ozone formation, fine particulates, and a multitude of potentially harmful pollutants that can trigger an asthma attack and other ailments; and

WHEREAS, asthma is a significant public health concern in NJ, especially among the elderly and children, where up to 25% of NJ's school age children are asthmatic; and

WHEREAS, for every gallon of gasoline used, the average car produces about 20 pounds of carbon dioxide (CO2), with one-third of greenhouse gas emissions coming from the transportation sector; and

WHEREAS, we can avoid producing unnecessary greenhouse gas emissions and exposure to air toxics by reducing or eliminating wasteful vehicle idling; and

WHEREAS, petroleum-based gasoline and diesel fuel are nonrenewable fuels and should be used wisely and not wasted and idling more than 10 seconds uses more fuel and emits more pollutants than turning a warm engine off and on again; and

WHEREAS, vehicle idling occurs in locations such as school grounds, parking lots, drive-through windows, business centers, etc. causing exposure to air pollutant emissions; and

WHEREAS, moving beyond New Jersey's existing no-idling code of 3 minutes would significantly improve public health, air quality, reduce costs and greenhouse gas emissions; and

NOW, THEREFORE, BE IT RESOLVED that the Township of Brick supports the adoption of "Idle Free Zones" by government agencies, schools, businesses, and other organizations by encouraging any gasoline or diesel powered motor vehicle to turn off their engines after 10 seconds if they plan to remain at that location for more than 30 seconds, ensuring idling does not occur at idle-frequent locations such as school drop-off and pick up, drive through windows, gas stations, parking lots, and business centers and maintaining municipal vehicles to eliminate any visible exhaust, enforcing existing violations and penalties under NJ's existing no-idling code, and supporting broad education of the public about the health, environmental and economic impacts of idling and ways to reduce idling.

§396-16. Definitions

For the purposes of this article, the following terms, phrases, words and their derivations shall have the meanings stated herein unless their use in the text of this article clearly demonstrates a different meaning. The definitions below are the same as or based on corresponding definitions in the New Jersey Pollutant Discharge Elimination-System (NJPDES) rules at N.J.A.C. 7:14A-1.2.

DOMESTIC SEWAGE - Waste and wastewater from humans or household operations.

ILLICIT CONNECTION - Any physical or nonphysical connection that discharges domestic sewage, on-contact cooling water, process wastewater, or other industrial waste (other than stormwater) to the municipal separate storm sewer system operated by the Township of Brick, unless that discharge is authorized under a NJPDES permit other than the Tier A municipal stormwater general permit (NJPDES Permit Number NJ00 141852). Nonphysical connections may include, but are not limited to, leaks, flows, or overflows into the municipal separate storm sewer system.

INDUSTRIAL WASTE - Nondomestic waste, including, but not limited to those pollutants regulated under Section 307(a), (b), or (c) of the Federal Clean Water Act [33 U.S.C. §1317(a), (b), or (c)].

MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) - A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by the Township of Brick or other public body, and is designed and used for collecting and conveying storm water.

NJPDES PERMIT - A permit issued by the New Jersey Department of Environmental Protection to implement the New Jersey Pollutant Discharge Elimination System (NJPDES) rules at N.J.A.C. 7:14A.

NONCONTACT COOLING WATER - Water used to reduce temperature for the purpose of cooling. Such waters do not come into direct contact with any raw material, intermediate product (other than heat) or finished product. Noncontact cooling water may however contain algacides or biocides to control fouling of equipment such as heat exchangers and/or corrosion inhibitors.

PROCESS WASTEWATER - Any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product. Process wastewater includes, but is not limited to, leachate and cooling water other than noncontact cooling water.

STORMWATER - Water resulting from precipitation (including rain and snow) that runs off the land's surface, is transmitted to the subsurface, is captured by separate storm sewers or other sewerage or drainage facilities, or is conveyed by snow removal equipment.

§ 396-17. Prohibited conduct

No person shall discharge or cause to be discharged through an illicit connection to the municipal separate storm sewer system operated by the Township of Brick any domestic sewage, noncontact cooling water, process wastewater, or other industrial waste (other than stormwater).

§ 396-18. Enforcement

This article shall be enforced by the Police Department, Engineering Department, and/or the Land Use Department of the Township of Brick.

§ 396-19. Violations and penalties

Any person(s) who is found to be in violation of the provisions of this article shall be subject to the penalties as provided in Chapter I, § 1-15, General penalty.

ARTICLE III

Private Storm Drain Inlet Retrofitting

§ 396-20. Purpose

The purpose of this article is to require the retrofitting of existing storm drain inlets which are in direct contact with repaving, repairing, reconstruction, resurfacing or alterations of facilities on private property, so as to prevent the discharge of solids and floatables (such as plastic bottles, cans, food wrappers and other litter) into the municipal separate storm sewer system(s) operated by the Township, so as to protect public health, safety and welfare, and to prescribe penalties for the failure to comply.

§ 396-21. Definitions

As used in this article, the following terms shall have the meanings indicated:

MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) –

A conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by the Township of Brick or other public body, and is designed and used for collecting and conveying stormwater.

PERSON - Any individual, corporation, company, partnership, firm, association, or political subdivision of this state subject to municipal jurisdiction.

STORM DRAIN INLET - An opening in a storm drain used to collect stormwater runoff and includes, but is not limited to, a grate inlet, curb-opening inlet, slotted inlet, and combination inlet.

WATERS OF THE STATE - The ocean and its estuaries, all springs, streams and bodies of surface water or groundwater, whether natural or artificial, within the boundaries of the State of New Jersey or subject to its jurisdiction.

§ 396-22. Prohibited conduct

No person in control of private property (except a residential lot with one single-family house) shall authorize the repaving, repairing (excluding the repair of individual potholes), resurfacing (including top coating or chip sealing with asphalt emulsion or a thin base of hot bitumen), reconstructing or altering any surface that is in direct contact with an existing storm drain inlet on that property unless the storm drain inlet either:

- A. Already meets the design standard set forth in § 396-10 to control passage of solid and floatable materials; or
- B. Is retrofitted or replaced to meet the design standard in § 396-10 prior to the completion of the project. This standard does not apply:
 - (1) To a residential lot developed with a single-family home or duplex; or
 - (2) To the repair of potholes, restriping of paved areas or maintenance pavement sweeping or cleaning of drainage system.

§ 396-23. Design standard

Storm drain inlets identified in § 396-21 shall comply with the following standard to control passage of solid and floatable material through storm drain inlets. For purposes of this section, "solid and floatable materials" means sediment, debris, trash, and other floating, suspended, or settleable solids. Exemptions to this standard are set forth below.

A. Grates.

(1) Design engineers shall use either of the following grates whenever they use a grate in pavement or another ground surface to collect stormwater from that surface into a storm drain or surface water body under that grate;

(a) The New Jersey Department of Transportation (NJDOT) bicycle safe grate, which is described in Chapter 2.4 of the NJDOT Bicycle Compatible Roadways and Bikeways Planning and Design Guidelines (April 1996); or

(b) A different grate, if each individual clear space in that grate has an area of no more than seven square inches, or is no greater than 0.5 inch across the smallest dimension.

(2) Examples of grates subject to this standard include grates in grate inlets, the grate portion (non-curb-opening portion) of combination inlets, grates on storm sewer manholes, ditch grates, trench grates, and grates of spacer bars in slotted drains. Examples of ground surfaces include surfaces of roads (including bridges), driveways, parking areas, bikeways, plazas, sidewalks, lawns, fields, open channels, and stormwater basin floors.

B. Whenever design engineers use a curb-opening inlet, the clear space in that curb opening (or each individual clear space, if the curb opening has two or more clear spaces) shall have an area of no more than seven square inches, or be no greater than two inches across the smallest dimension.

C. Exemptions. This standard does not apply:

(1) Where the Municipal Engineer agrees that this standard would cause inadequate hydraulic performance that could not practicably be overcome by using additional or larger storm drain inlets that meet these standards;

(2) Where flows are conveyed through any device (e.g., end-of-pipe netting facility, manufactured treatment device, or a catch basin hood) that is designed, at a minimum, to prevent delivery of all solid and floatable materials that could not pass through one of the following:

(a) A rectangular space 4 5/8 inches long and 1 1/2 inches wide (this option does not apply for outfall netting facilities.); or

(b) A bar screen having a bar spacing of 0.5 inch.

- (3) Where flows are conveyed through a trash rack that has parallel bars with one-inch spacing between the bars; or
- (4) Where the New Jersey Department of Environmental Protection determines, pursuant to the New Jersey Register of Historic Places Rules at N.J.A.C. 7:4- 7.2(c), that action to meet this standard is an undertaking that constitutes an encroachment or will damage or destroy the New Jersey Register-listed historic property.

§ 396-24. Enforcement

This article shall be enforced by the Municipal Engineer of the Township of Brick.

§ 396-25. Violations and penalties

Any person(s) found to be in violation of the provisions of this article shall be subject to a fine not to exceed \$500 for each storm drain inlet that is not retrofitted to meet the design standard.

**ARTICLE IV
Refuse Containers and Dumpsters**

§ 396-26. Purpose
